Project Title: Batasey - A Comprehensive Travel Website and App

Introduction: Batasey is a comprehensive travel website and app that aims to provide a one-stop solution for all travel needs. The website offers recommendations for both known and lesser-known destinations, a list planner to make trip planning easy, and a budget calculator to help estimate the cost of a trip. In addition to these features, the website also includes the option to book flights, buses, and hotels.

Features:

•   *Recommendations for destinations*: It offers a curated list of destinations that includes both popular and lesser-known places. These places are carefully selected based on their unique characteristics, natural beauty, cultural significance, and popularity among tourists. Users can search for destinations based on their interests, such as nature, culture, adventure, and more.

•   *List planner*: It provides a list planner that allows users to create a customized itinerary for their trip. The planner includes options to add destinations, activities, and accommodations to the itinerary. Users can also set a budget for their trip and the planner will automatically calculate the estimated cost of the itinerary.

•   *Budget calculator*: It includes a budget calculator that helps users estimate the cost of their trip. The calculator takes into account the cost of accommodations, transportation, and activities. Users can also add any additional expenses to the calculator to get a more accurate estimate of the total cost of the trip.

•   *Flight, bus, and hotel booking*: It includes the option to book flights, buses, and hotels directly from the website. Users can search for and compare different flight, bus, and hotel options and book the one that best suits their needs. The website partners with different flight, bus, and hotel booking providers to offer a wide range of options to users.

•   *Reviews and ratings*: It allows users to leave reviews and ratings for the destinations, accommodations, flights, buses, and hotels they have visited. This feature helps other users make informed decisions when planning their trip. Reviews and ratings are moderated by the website's team to ensure that they are accurate and helpful.

•   *User registration and login*: It requires users to register and login to access certain features, such as the list planner, budget calculator, and booking options. This feature helps to personalize the experience for each user and also allows users to save their itineraries, bookings for future reference and track the status of the bookings.

Design and Technology: It is designed with a clean and minimalistic layout to make it easy for users to navigate. The website is built using HTML, CSS as front-end and Python Django as a backend. The app is built using flutter. The website and app are optimized for both desktop and mobile devices.

Conclusion: Batasey is a comprehensive travel website and app that offers a one-stop solution for all travel needs. It's recommendations for both known and lesser-known destinations, list planner, and budget calculator make trip planning easy and convenient. The website's and app's design and technology make it easy for users to navigate and find the information they need. The website's and

app's booking options for flights, buses, and hotels make it easy for users to plan and book their entire trip on the website. It's review and rating feature help other users make informed decisions when planning their trip. With Batasey, users can be sure to have a unique and memorable travel experience, whether they are looking for a popular or an off-the-beaten-path destination. The website is built using modern technologies like HTML, CSS, Python Django and the app is built using flutter making it robust and scalable.
